

Large Kangaroo Apple *Solanum laciniatum*

Flowers: September - March. H 1-3m x W 1-3m.

Attractive very fast growing large shrub with dark green on the upper surface of the leaf & pale green underneath. Plentiful blue to purple flowers with bright yellow centers. Egg shaped fruit turning from green to yellow & to red when ripe. Takes well to pruning. Will tolerate most soil types & conditions. ideal as a quick growing screen plant. Considered to be short lived (4 to 6 years). Hardy once established. Solanum species are colonisers of disturbed areas
