

Prickly Moses *Acacia verticillata* var. *verticillata*

Flowers: June to October - H 2-3+m x W 2-3m.

Open erect shrub prefers dry to moist well drained soils, tolerating some water-logging. An attractive & profuse flowerer with whorls of prickly phyllodes [modified leaves] along its slender branches. Allows plenty of light through to smaller plants below or around its margins & takes well to pruning.
