

# Showy Bossiaea *Bossiaea cinerea*

*Flowers: July to December - H 1-1.5m x W 1-1.5m.*

Known for its showy display of yellow & red pea flowers & fine decorative foliage. Spectacular when in full flower, especially when grown in an open sunny position. Requires well drained soils on dry or well drained moist sites with full sun to partial shade. Often difficult to establish requiring protection from disturbance & regular watering over its first summer. Once established *B. cinerea* is a very hardy shrub that responds well to occasional light pruning. Protect the root zone from disturbances.
