

## Bulbine-lily *Bulbine bulbosa*

*Flowers: September to January. H 20-60cm x W 30cm.*

Small to medium lily with bright yellow flowers. Suited to moist well drained soils. Grows in full sun to part shade. Looks attractive planted in groups. Bulbine-lilies are soft delicate plants & will need protection from damage. Fast growing with a long a flowering time. Watering will produce a bigger more robust plant with a longer flowering period. Keep some clear soil areas around the plants as it will self-sow prolifically. Protect from slugs & snails.
