

Blushing Bindweed *Convolvulus erubescens*

Flowers: August to February. H prostrate x- W 1-1.5m.

Small attractive scrambler that likes sunny areas. Twines its way through and up grass stems & other small plants, flowering in splashes of pink along its twining path. Mix with established grasses like wallaby grasses. Flowers vary from pale pink to deep pink, with attractive soft green leaves. Can be lush & vigorous if it finds a moist sunny position. Self seeds well.
