

# Small Flower Flax-lily *Dianella revoluta* var. *brevicaulis*

*Flowers: September to December. H 30-50cm x W 30-50cm.*

A tufting plant with strappy foliage. Pale blue flowers appearing among the strappy leaves, these are followed by bright-blue berries. Prefers full sun to part shade and can cope in a range of soil types, provided the soils are well drained. Long lived and tolerant to frost & drought and can cope with coastal conditions. An attractive versatile plant well worth using in gardens, rockeries or beside pathways.
