

## Tall Spike Rush *Eleocharis sphacelata*

*Flowers: November to February. H 50cm - 2m W Spreading.*

Large green upright reeds, with the flower/seed head on the tip of the reed. It is a favourite of water birds for nesting material. Provides protection for fish and birds. Once established it will dominate most other water plants and cover large areas of the water body. Can grow in water 1m to 2m deep. Found in fresh water dams & wetlands.
