

Swamp Gum *Eucalyptus ovata*

Flowers: March to July - H 8-30m x W 8-20m.

Spreading or upright tree that is well suited to poorly drained areas, but can also tolerate drier soil conditions. Prefers growing on sandy soils & on light clays. The upper bark sheds in ribbons, leaving branches creamy to grey in colour, while rough bark persists on the lower trunk. Flowers are creamy white & juvenile leaves are roundish or ovate in shape. One of the Koala's favourite food sources.
