

Coast Manna-gum *Eucalyptus viminalis* ssp. *pryoriana*

Flowers: March to May - January - H 12m x W 12+m.

Attractive spreading tree growing to about 12 metres high. Moderately dense canopy, thinning on older trees, The bark is fibrous & rough persisting to the smaller twigs. Grows best in dry, well drained sandy soils or moist well drained soils & is tolerant of some periodic water-logging. Flowers are creamy-yellow in colour. Once widespread across the Elster Creek catchment now mainly restricted to a few reserves in the region.
