

Purple Coral-pea *Hardenbergia violacea*

Flowers: July to November.

Scrambler/climber, usually with mauve to purple flowers although white & pink flowers have been recorded. Needs well drained soils. Can be grown as a scrambling shrub in open positions. The sandbelt form has deep-purple flowers with green centres. The local sandbelt plant is less vigorous than the hybrid 'Happy Wanderer' available through mainstream nurseries. The "Happy Wanderer" is often seen growing on fences or other structures to form dense screens..
