

## Bundled Guinea-flower *Hibbertia fasciculata*

*Flowers: can be variable : peaking September to November. H 30-60cm x W 40cm.*

Low growing shrub with attractive soft foliage and golden yellow flowers. Prefers well drained sandy soils with full sun to dappled shade. Mixes well with smaller grasses, lilies & shrubs. Moderately fast growing if kept moist through dry periods until established. Grows well under some of the more open sparse shrubs like some of the Acacia's or dwarf Allocasuarina.
