

# Burgan *Kunzea ericoides*

*Flowers: November to February - H 2-5m x W 1-4m.*

A large shrub to 3+ metres on the sandbelt taller elsewhere. Prefers an open position in moist soil tolerating dry sites. Flowers in an attractive mass of small white flowers. Has soft foliage & attractive seed capsules. Quick growing, long lived & hardy. Can be pruned to keep neat. Can grow and flower well in shady areas, but flowers best in open sunny areas. Considered an invasive plant in some areas.
