

# Prickly Tea-tree *Leptospermum continentale*

*Flowers: October to March - H 1-1.5+m x W 1-1.5+m.*

Fast growing hardy plant that grows in full sun to shady positions. Does well on poorly drained soils, is adaptable to most soil types & moisture levels. Prickly leaves with attractive white flowers flowering over a long period. Position away from paths and areas where people will come into contact with the pungent leaves.
