

Swamp Paperbark *Melaleuca ericifolia*

Flowers: October to November - H 2-8m - W 2-3m

Erect, small tree with fine, soft foliage occurring naturally along water courses & wetlands, prominent throughout water-logged areas. Very hardy and drought tolerant tree. Pale papery bark & fragrant creamy-yellow bottlebrush-like flowers & dense fine foliage makes for an attractive & effective screening tree, that takes well to pruning. Planting in groups improves the aesthetic value of this tree.
