

Scented Paperbark *Melaleuca squarrosa*

Flowers: September to February. H 2-4m - W 1-8m.

Usually an erect shrub or small tree with dark green ovate leaves arranged in pairs opposite each other along slender branches. During spring & summer it displays scented creamy white bottlebrush flowers. Adaptable to most soils & conditions as it is often found in dry forests & in swamps or along watercourses. Tolerant of dry conditions once established. Noted as taking well to pruning.
