

## Yellow Rush-lily *Tricoryne elatior*

*Flowers: October to March. H 20 - 50cm x W 30 - 50cm.*

Wiry inconspicuous plant usually going unnoticed until flowering. Very slender, multiple branched with few grass-like leaves at the base & bright yellow star-shaped flowers, 6 to 12 mm in size. Widespread in localized patches. Likes moist well drained to dry soil in grassy open woodland with full sun to semi shade. Flowers last a long time & open on sunny afternoons.
